

WELCOME TO PINEHURST NEUROPSYCHOLOGY

You have been referred by: _____

A Neuropsychological evaluation generally takes three appointments

As we discussed on the telephone, your appointments are as follows:

1st appointment: _____ An interview where Dr. _____ will learn about your concerns and medical and personal history (takes about 1 hour)

2nd appointment: _____ A testing session that occurs a week or so after the interview (takes about 2-3 hours)

3rd appointment: _____ A feedback appointment when the results of your evaluation and Dr. _____'s personalized recommendations will be explained in detail (takes about 1 hour)

You and someone who knows you well should attend the interview and feedback, if possible (a spouse, child or friend, for example). The testing session only involves you.

Important things to know:

- Please bring your glasses and/or hearing aids. Take any medication you normally take. Bring your insurance card and driver's license to the 1st appointment so that I can confirm your insurance benefits. Take any medications you normally take. Please arrive 10 minutes early to complete paperwork.
- One form is included for you to complete prior to your appointment. Please complete the History Form and bring it with you.
- It is natural to feel a bit nervous when meeting a new doctor or talking about sensitive issues like possible memory loss but I assure you that Dr. _____ and I will do our best to make you feel comfortable and treat you with the highest level of respect and kindness. Our goal is to make you feel at ease and well cared for during your time with us.

We look forward to making a difference in your health care!

Warm regards,

Christy Skipper
Practice Manager
